PROFESSIONAL SUMMARY

Full Stack Developer who takes products from idea to production. I lead development of Moeda Nobre, a benefits fintech with a web platform and two published apps, and I shipped Athena7, a multi-tenant whistleblowing SaaS, to production. I work with TypeScript, React, Next.js, Node.js, PostgreSQL and MySQL, run infrastructure on AWS and VPS, and integrate AI into products. I care about simple, well-structured code that holds up in real use.

PROFESSIONAL EXPERIENCE

Software Engineer · TribeX Tecnologia Financeira S/A Feb 2026 – Present
Freelance · Remote

- Lead development of Moeda Nobre: companies and city governments distribute balances to employees, who pay by phone at accredited merchants, and merchants receive via Pix.
- Built the web platform for operations, companies and merchants (Next.js, TypeScript, PostgreSQL).
- Shipped two iOS and Android apps: one for employees to pay and check balance and statement, one for merchants to charge and track receivables.
- Implemented financial controls: multi-step approval, audit trail and separation between who authorizes and who pays.
- Integrated payments with point-of-sale systems, so merchants charge on their POS and employees pay in the app.

Full Stack Developer · Self-employed Jun 2026 – Present
Remote · Brazil and Ireland

- Built the Innovation Business Alliance (IBA) platform, an innovation network across Brazil, Ireland and the UK: member portal, admin panel, event check-in, AI and five languages.
- Restructure AI-built projects so they are production-ready: architecture review, refactoring, integrations and performance.
- Deliver custom websites and landing pages, from design to deploy, for clients such as Módulo Engenharia, BRASA and Automotiva Express.

Web Developer (Athena7) · Inspire4U Jan 2026 – Jun 2026
Part-time · Hybrid · Belo Horizonte

- Took over full stack development of Athena7, a whistleblowing SaaS, and brought the platform to production (TypeScript, React, Node.js, MySQL).
- Designed and implemented the multi-tenant architecture with role-based access control.
- Led the infrastructure migration between AWS and a private VPS and the production deploy.
- Integrated an AI assistant that guides users without exposing sensitive data.

Digital Support and Web Development · Inspire4U May 2025 – Dec 2025
Internship · Belo Horizonte

- Developed and maintained WordPress websites, with HTML, CSS and JavaScript customizations.
- Applied on-page SEO and provided ongoing support for partner fintechs' web projects.

EDUCATION

Technical Degree in Web and Mobile Development · COTEMIG, Belo Horizonte Feb 2025 – Dec 2026 (expected)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C#, SQL, Dart, Kotlin, Swift, HTML, CSS
Front-end: React, Next.js, Tailwind CSS, responsive design, accessibility, web performance
Back-end and data: Node.js, REST APIs, PostgreSQL, MySQL, Prisma, Redis, authentication, multi-tenant architecture
Mobile: iOS, Android, Flutter, App Store and Google Play publishing
Infrastructure: AWS, VPS, Docker, Nginx, Vercel, Linux, Git, production deploy
AI and other: AI integration, conversational assistants, prompt engineering, Pix payments, LGPD/GDPR, technical SEO, Figma

COURSES AND CERTIFICATIONS

Artificial Intelligence: Develop Products and Services Using AI · MIT Professional Education Dec 2025
Events: AWS AI Agents Hackathon (Canastra Ventures, 2026) and Money20/20 Europe.

LANGUAGES

Portuguese (native) · English (fluent)
