Bernardo Iannini

Full Stack Developer | Software Engineer | SaaS, Fintech and Mobile Apps

Belo Horizonte, Brazil · +55 31 99562-4617 · bernardo.iannini14@gmail.com
www.bernardoiannini.com · linkedin.com/in/bernardo-iannini · github.com/iannini25

PROFESSIONAL SUMMARY

Full Stack Developer who builds complete systems, from architecture to production deploy. Led the development of Moeda Nobre, a benefits fintech with a web platform and two apps live on the App Store and Google Play, and took over full-stack development of Athena7, a multi-tenant whistleblowing SaaS, through to production. Experienced with TypeScript, React, Next.js, Node.js, PostgreSQL and MySQL, AWS and VPS infrastructure, AI integration and financial controls (multi-step approval, audit trail, segregation of duties). Certified by MIT Professional Education in AI products. Fluent English.

PROFESSIONAL EXPERIENCE

Software Engineer · TribeX Tecnologia Financeira S/A Feb 2026 – Present

Freelance · Remote

- Led the development of Moeda Nobre, a benefits platform where companies and cities distribute balances to employees, who pay at accredited merchants by phone (QR Code and PIN) while merchants receive via Pix.
- Built the web platform for operations, companies and merchants, with a corporate website and city pages (Next.js, TypeScript, PostgreSQL).
- Shipped two iOS and Android apps: Moeda Nobre Benefícios (balance, payments, statement) and Moeda Nobre Vendas (merchant charges and receivables).
- Implemented financial controls: multi-step approval, full audit trail and separation between who authorizes and who pays.
- Integrated the flow with point-of-sale systems so merchants charge on their POS while employees pay in the app.

Full Stack Developer · Self-employed Jun 2026 – Present

Remote · Brazil and Ireland

- End-to-end development of SaaS platforms, landing pages, automations and custom systems, from design to deploy.
- Innovation Business Alliance (IBA): full development of the international networking platform connecting Brazil, Ireland and the UK, with member portal, admin panel, event check-in, AI over the knowledge base and five languages.
- Restructuring AI-built projects: architecture review, refactoring and production readiness, with integrations and performance work.

Web Developer (Athena7) · Inspire4U Jan 2026 – Jun 2026

Part-time · Hybrid · Belo Horizonte

- Took over full-stack development of Athena7, a whistleblowing SaaS, and brought the platform to production (TypeScript, React, Node.js, MySQL).
- Designed and implemented the multi-tenant architecture with role-based access control.
- Led the infrastructure migration between AWS and a private VPS and took part in production deploy and operations.
- Integrated an AI assistant that guides users while minimizing exposure of sensitive data, in a privacy-first product.

Digital Support and Web Development · Inspire4U May 2025 – Dec 2025

Internship · Belo Horizonte

- Developed and maintained WordPress websites focused on performance and usability.
- HTML, CSS and JavaScript customizations and on-page SEO to improve rankings.
- Digital support and ongoing maintenance of partner fintechs' web projects.

PROJECTS IN PRODUCTION

Moeda Nobre (benefits fintech, web + 2 apps), Athena7 (whistleblowing SaaS), IBA (international innovation network), plus websites for Módulo Engenharia, BRASA, Sereno, Amaro.fy and Automotiva Express. Portfolio: www.bernardoiannini.com
